

Make Your Own Focus Star Ornament

You will need:

- A printer
- A4 card or paper
(for the best results use card,
but only if your printer can handle it!)
- Scissors
- Paper adhesive
- Ribbon or thread

Method:

- Print as many of these pages as you wish - one page per ornament (for best results, use your printer's 'high quality print' setting)
- Cut out the two star shapes (make sure you cut around the white tabs)
- Fold along all the dotted lines to create a half 3D out of each shape
- Apply adhesive to the white tabs
- Press the two halves together and hold in place until stuck
- Make a small hole at one tip or use glue to attach a ribbon or thread
- Hang up your star!
